PET HEALTH AWARENESS BOOKMARK

Five Times -
Pets age at a rate of five to seven times our aging process. So, a regular exam is very important to their well-being.

A routine check-up allows your veterinarian to identify or prevent medical conditions early - before they become major problems. Conditions such as dental problems and heart disease can be diagnosed early, and many cancers, especially skin cancer, can be detected.

When simple diagnostic lab work is combined with regular examinations, kidney and liver disease, anemia, and other internal problems can be discovered before any clinical symptoms appear. Many times pets are sicker internally than they let us know externally, and a simple regular exam could prove to be a life-saver.

PET HEALTH AWARENESS BOOKMARK

The #1 PET HEALTH PROBLEM diagnosed at WAUNAKEE VETERINARY CLINIC is oral disease. We continue to promote awareness of the importance of preventative dental care in maintaining your pet's overall health. Dental disease is **PAINFUL** to your pet. Regular exams and cleaning are important to keep your pet happy, and healthy!

The bacteria in dental disease can spread throughout the body weakening the liver, kidneys and heart.

Proper dental care can increase your pet's life expectancy!
