# Your Pet's Senior Years

*"we love our  
senior pets"*

**7X**  
SEVEN TIMES

## Where does the time go?

Most of us don't need a medical checkup more than once a year, but dogs and cats are different. Pets, on average, age up to **SEVEN TIMES** faster than humans, and by age two, most have already reached adulthood. At age four, many pets are entering middle age. By age seven, dogs and cats are considered seniors, and at age ten, they enter the geriatric stage of their lives.

As you always have, you can continue to show your love and devotion by ensuring age-related health care. In honor of National Senior Pet Health Month, we are offering a special diagnostic checkup for our grand patients.

## Your Pet's Senior Exam Is Different

This is not your regular pet health exam. A senior health screening exam involves state-of-the-art laboratory analysis of your pet's internal functions. These tests help diagnose blood disorders, kidney and liver disease, diabetes, infections, thyroid abnormalities, and other potential illnesses before they become life threatening. Radiographs can help diagnose heart disease, cancer, and osteoarthritis. **An ounce of prevention is worth a pound of cure!** Help your "best friend" live a longer, healthier and happier life.

**IMPORTANT SENIOR NOTE:** Data from senior health screening exams show that more than 22% of senior dogs and 17% of cats that appear healthy have been found to have significant subclinical disease.

## How Old Is Your Seven-Year-Old?

(equivalent age in human years based on your pet's weight)

Pet's Age In Years	Cats		Dogs (by weight)			
	0-20 lbs.	21-50 lbs.	51-90 lbs.	> 90 lbs.		
5	36	36	37	40	42	
6	40	40	42	45	49	
7	44	44	47	50	56	
8	48	48	51	55	64	
9	52	52	56	61	71	
10	56	56	60	66	78	
11	60	60	65	72	86	
12	64	64	69	77	93	
13	68	68	74	82	101	
14	72	72	78	88	108	
15	76	76	83	93	115	
16	80	80	87	99	123	
17	84	84	92	104		
18	88	88	96	109		
19	92	92	101	115		
20	96	96	105	120
